

FleetCrew ISync & Dashboard

Connect to Your Fleet | Smart Maintenance Management

FleetCrew ISync allows you to connect to your fleet and take better control of your fleet maintenance management. ISync devices connect to your engine and retrofit devices, remotely downloads data files, and transfers them wirelessly back to our IQ database.

The FleetCrew Dashboard provides you with the visibility and the tools you need to make smart timely decisions. View engine and filter maintenance alerts as they happen in real time and assess the recommended "meaningful" corrective actions (not just numerical codes that are worthless, like other GPS systems). Tracking your maintenance stats and location of your vehicles and assets will help improve your fleet's overall efficiency and performance while saving you time and money!

● **Level 1: Dashboard Fleet Maintenance/Management Access**

Access fleet & service records. Once a FleetCrew technician has visited your location and submitted the data into our IQ database, the information is accessible to you. The data is processed and displayed on your client dashboard. Includes unlimited users, use of alerts, and IPulse notifications.

Complimentary: Dashboard User Setup, Training and Instructions

● **Level 2: REAL TIME: GPS, Fuel, Route Tracking, ECU codes**

Real-time tracking through the Engine Control Unit (ECU) monitors your engine data, your DPF filter status, fuel usage, and GPS movement. Data is transmitted "live" providing proactive feedback to your maintenance team, highlighting issues as they occur and recommended actions. Level 2 replaces the existing channel of communication, alerting the fleet maintenance manager immediately through alerts and IPulse notification system.

One Time Fee: \$227.00

Includes: ISync device fee, Harness and Installation of the device

Monthly Fee: \$46.50

Includes: Monthly air-time cost and service maintenance administration fee

Complimentary: Dashboard User Setup, Training and Instructions

Monthly Billing: All monthly service fees are billed up front and quarterly unless client chooses 1-year discount. Monthly premiums billed annually are discounted from \$558.00 per year to \$500 per year.
